Borate Pressure Treated Wood for Interior & Exterior Applications

Product Applications

Decking • Fencing • Sill Plates • Framing Lumber • Studs • Floor Joists
Roof Rafters • Trusses • Plywood • Sheathing • Furring Strips
Playgrounds • Pre-Fab Wall Systems • Moldings • Flooring • Wood Trim

Product Features

- Lumber & Plywood are pressure treated with DOT Borates (Disodium Octaborate Tetrahydrate), a natural preservative & **EnviroSafe Plus®**, a colorless water-repellant polymer system.
- For use in accordance with ICC-AC62 (Interior & Exterior Applications), EPA Registration No. 79628-1 (Interior & Exterior Applications) & AWWA P5, UC2 (Interior Applications).
- Virtually Non-Corrosive – Standard G60 & G90 Fasteners recommended.
- Fire Retardant Properties.
- Low Toxicity – low risk to humans & other non-target animals.
- Odorless & Non-Volatile – no negative effects on indoor air quality.
- Effective against Termites, Powder Post Beetles, Carpenter Ants and other Wood-Destroying Insects.
- Wood retains natural color characteristics after pressure treatment allowing for a natural wood look or for stain to be applied.
- Minimum wear on tools.
- No adverse effects on strength or elasticity of lumber.
- 40 Year Transferable Limited Warranty.
